

▼ Dumas' easy access to railroads and its location along the Port-to-Plains Trade Corridor make it a convenient, cost-effective distribution location.

DISTRIBUTION FROM DUMAS

Centrally located in the nation, Dumas is a distribution hub for transporting goods by road, rail, or air.

ROAD

Dumas is located along Highways 87 and 287 of the Ports-to-Plains Trade Corridor, a multimodal transportation corridor that includes multilane divided highways. This highway system facilitates efficient transportation of goods and services from Mexico, through West Texas, Oklahoma, New Mexico, Colorado, and into Canada and the Pacific Northwest. Just south of Dumas sits the east-west conduit, Interstate 40. This ease of access is perfect for businesses that require a centrally located distribution hub. A 265-acre business park boasts highway access for added convenience. Trucking companies looking for a skilled workforce, the local college will soon offer truck-driving courses.

RAIL

For those needing to distribute larger loads or oversized equipment, Dumas is located along the Burlington Northern Santa Fe Railroad (BNSF) line and the Texas North-west short line—one of the top short lines for the BNSF. To increase efficiency and reduce additional distribution expenses, there are available business sites with rail access, and the short line is primed to accept additional traffic. Because of its railroad-highway combination, Dumas works well for companies in need of transload facilities.

AIR

Near Dumas, the Moore County Airport has a newly expanded 6,000-foot runway to accommodate jets. Just five minutes from Highway 287, it provides quick access from planes to major highways. For companies requiring a larger airport, Amarillo International Airport is a 40-minute drive from Dumas.

DUMAS IS AN EIGHT-HOUR DRIVE OR LESS FROM THE FOLLOWING PLACES:

Albuquerque, NM
Austin, TX
