

SITED FOR SUCCESS

Rated as one of the nation's top wind energy locations, Dumas is the regional hub for harnessing wind and building the related support industries.

In Dumas' Moore County, class 4-plus winds offer some of the country's best opportunities for harnessing their energy. These high-powered winds, coupled with multiple wind transmission and distribution projects, make Dumas an ideal location to capture the energy or provide related services. Building on the area's logistical benefits, the local government is motivated to recruit and develop wind-related companies, and local landowners are eager to make deals with developers. It's no wonder Expansion Solutions magazine designated Dumas as one of the United States' top five locations for wind energy in 2010. As the Dumas area's megawatts of wind energy continue to rise, opportunities for service and manufacturing companies also increase.

WIND POWER

Top 10 Reasons Dumas is Right for Wind

- | | | |
|--|---|---|
| <ol style="list-style-type: none"> 1. Class 4-plus winds measuring 9.4 m/sec at 80 meters 2. Approximately 8,000 megawatts of current and proposed wind within a three-hour radius 3. Multiple major transmission projects in all directions 4. Deregulated with no local permitting | <ol style="list-style-type: none"> 5. 265-acre business park adjacent to a major highway 6. Centrally located along a major 4-lane corridor for easy shipping and distribution 7. Immediate rail access available 8. No-lease programs for qualified businesses | <ol style="list-style-type: none"> 9. State and local incentives available 10. Skilled, trained workforce through Wind and Renewable Energy Technical Training Program at local college |
